

FRONT-END DEVELOPER SSR/SR

SOFTWARE DEVELOPMENT | LA PLATA - NEUQUEN

Are you into coding best practices and have experience working with enterprise solutions? Work hand-in-hand with a development team creating high-quality web applications!

WHAT YOU'LL BE DOING

You'll be working side by side with our clients, in a team which develops innovative web applications with focus on quality. You'll also be taking into account the latest UI/UX patterns.

REQUIRED SKILLSET

- 2+ years experience working in web development.
- Experience with JavaScript modern frameworks such as Angular, React or Vue.js
- Experience with Web tools and best practices (SASS, LESS).
- New web standards knowledge (HTML5, CSS3).
- Experience with Git.
- Fluent in written and spoken english.

You fancy flat hierarchy and direct communication? You share [our values and visions](#)? Send your application to contribute to our team and enjoy our unique work culture!

WHAT YOU'LL BE IN CHARGE OF

- # Maintaining and improving web applications.
- # Taking into account visual aspects and architecture.
- # Researching new technologies to improve our processes.
- # Keeping up to date with bleeding edge technologies and clean code.

MORE ABOUT YOUR PERSONALITY

- # Passion to learn and make things work.
- # Fast learner.
- # Communication and interpersonal skills.

NICE TO HAVE SKILLS

- # Knowledge of React and Webpack.
- # Experience working with UX and UI design
- # Experience working with NodeJS.
- # Network concepts (SSH, DNS, Proxy, etc)
- # Experience integrating with third party APIs such as Google (Analytics, Maps, etc.)
