

BACK-END DEVELOPER SSR

SOFTWARE BOUTIQUE | LA PLATA

You are keen on coding best practices and have experience working with enterprise solutions? Fancy working hand-in-hand with a development team creating high-quality web applications? We are on the lookout for an experienced back-end developer to join us!

WHAT YOU'LL BE DOING

You'll be working side by side with our clients, in a team which develops innovative web applications with a focus on quality. You'll also be taking into account the latest UI/UX patterns.

REQUIRED SKILLSET

- 2+ years experience** working on web development
- Experience working** with NodeJS or some sort of object oriented languages (Python, Ruby, Java).
- Experience with **Web tools** and best practices (AMD, RequireJS, Bower, Gulp, SASS, LESS).
- Experience with Git
- Fluent in written and spoken english

WHAT YOU'LL BE IN CHARGE OF

- # Maintaining and improving web applications.
- # Taking into account visual aspects and architecture.
- # Researching new technologies to improve our processes.
- # Keeping up to date with bleeding edge technologies and clean code.

MORE ABOUT YOUR PERSONALITY

- # Passion for continuous learning and making things work.
- # Commitment in sharing knowledge.
- # Communication and interpersonal skills.

NICE TO HAVE SKILLS

- # Cloud platforms management like AWS, Google Cloud, etc.
- # Knowledge of Webpack.
- # Experience working with REST APIs and GraphQL.

You fancy flat hierarchy and direct communication? You share [our values and visions](#)? Send your application to contribute to our team and enjoy our unique work culture!
